

Proposal for Impact Measurement Partnership

Introduction:

Labourhome is a social enterprise that has been working since 2019 to improve the livelihoods of construction workers across India. We are dedicated to addressing the challenges faced by blue-collar workers through both a tech-enabled aggregation platform and a strong focus on social impact. Over the past four years, Labourhome has grown into a key player in the construction industry expanding its reach to 28 projects, deploying skilled and unskilled workers to major infrastructure projects in India for companies like Larsen & Toubro, Tata Projects, Adani Projects, and more. We are now expanding our scope to international markets, leveraging our recent licensing by the Ministry of External Affairs.

Labourhome: A Comprehensive Workforce Solution

At our core, Labourhome focuses on bridging the gap between manpower and industry demand through an efficient, transparent, and scalable digital platform. By facilitating recruitment, payroll management, and operational support, we have deployed over a million construction workers to date.

While we provide tangible solutions for the construction sector, our broader vision extends to creating meaningful social and economic value for the marginalized workforce.

Social Impact Initiatives:

As a social enterprise, Labourhome is committed to improving the living standards of construction workers by aligning our efforts with Sustainable Development Goals (SDGs) 1 (No Poverty), 3 (Good Health and Well-being), and 8 (Decent Work and Economic Growth).

Our **Social Impact Team** plays a pivotal role in delivering this vision by focusing on the following areas:

1. **BOCW Registration:** Facilitating worker registration under the Building and Other Construction Workers (BOCW) Act to unlock welfare benefits such as healthcare, pension, and accident coverage.
 2. **Access to Welfare Schemes:** We ensure workers benefit from government schemes like Ayushman Bharat, E-Shram Cards, and ABHA Health Accounts, providing them with financial and social security.
 3. **On-Site Initiatives:** Organizing workshops, health camps, and information sessions to raise awareness about workplace safety, health, and workers' rights.
 4. **Strategic Partnerships:** Collaborating with organizations to amplify our social impact by improving access to healthcare and welfare schemes for workers and their families.
-

Impact Measurement Requirement:

In alignment with our mission, we aim to systematically track and measure the impact of our social initiatives. We are seeking to partner with a leading impact measurement firm to develop an **Impact Measurement Report** that captures both quantitative and qualitative outcomes of our interventions.

Our goal is to document the social and economic transformations experienced by construction workers through our initiatives. This report will serve as a comprehensive evaluation of our progress and help guide future efforts.

Key Objectives for the Impact Measurement Report:

- ☐ Evaluate **job creation and income progression** of workers, tracking skilled vs. unskilled roles.
- ☐ Analyse **enrolment in welfare schemes** like Ayushman Bharat and E-Shram, and their impact on healthcare and financial security.
- ☐ Assess **the success of BOCW registration** and its contribution to social security benefits for workers.

- ☑ Measure **improvements in worker health** through access to healthcare services and safety programs.
 - ☑ Document **testimonials and case studies** for qualitative insights into workers' personal experiences.
 - ☑ Track **progress towards SDG 1, 3, and 8**, using data driven KPIs to quantify Labourhome's social impact.
-

Timeline & Partnership Scope:

We are looking to begin the impact measurement process immediately, with the goal of finalizing and publishing the report within the next **4-5 months** (early 2024). The selected firm will play a critical role in:

- Designing the impact framework.
- Collecting and analysing data from our worker engagement programs, partnerships, and on-site initiatives.
- Producing a detailed report that outlines key findings, metrics, and areas for future improvement.

While we are open to discussing the commercial aspects of the partnership after exploring synergies, we would appreciate understanding in what capacity your firm can assist us in preparing the impact report. We look forward to exploring this collaboration further.

Budget & Next Steps:

The budget for the impact measurement will be discussed based on the scope of work, data collection methods, and deliverables. We are flexible and open to negotiation, ensuring that both parties benefit from the collaboration.

We hope this proposal provides a clear understanding of our social impact journey and our requirements for this partnership. We look forward to hearing from you and discussing how we can work together to create a comprehensive impact measurement report.

Conclusion:

Labourhome remains committed to improving the lives of construction workers and contributing to the nation's growth. By partnering with an impact measurement firm, we aim to not only track our success but also scale our impact in the future. We look forward to the possibility of working together to achieve these shared goals.
